REASONS FOR ALLOWANCE

1. Claims 1-9, 11-20, and 22-26 are allowed over the prior art of record.
2. Claims 10 and 21 have been canceled.
3. The following is an examiner's statement of reasons for allowance: The Applicant's arguments filed on 6/5/2007 are persuasive. **The feature of independent claims 1 and 12** directed towards allowable subject matter is a switching unit for transferring power to the data and gate driving units, a timing controller for generating timing signals to drive the liquid crystal panel depending upon horizontal and vertical synchronization signals which are input from an outside, and a determination unit for determining whether either one of or both of the horizontal and vertical synchronization signals are input from the outside, and controlling the switching unit and the timing controller, and performing a normal mode or power saving mode depending upon determination results. **As argued by the Applicant** and applied claims 1 and 12 Yoo fails to teach of determining whether either one of or both of horizontal and vertical synchronization signals are input from an outside, and controlling the switching unit and the timing controller, and performing a normal mode or power saving mode depending upon determination results. Yoo fails to distinguish the synchronization signals and fails to include a determination unit controlling the timing controller and switching unit as claimed. **Therefore** the above said features in combination with the other limitations of the above independent claims 1 and 12 are found to be allowable over the prior art of record, and therefore claims 1-9, 11-20, and 22-26 are allowable.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
